

# The Annual Quality Assurance Report (AQAR) of the IQAC

All NAAC accredited institutions will submit an annual self-reviewed progress report to NAAC, through its IQAC. The report is to detail the tangible results achieved in key areas, specifically identified by the institutional IQAC at the beginning of the academic year. The AQAR will detail the result of the perspective plan worked out by the IQAC. (*Note: the AQAR period would be the Academic Year. For example, July 1, 2012 to June 30, 2013*)

## **ANNEXURE-3**

### Practice I

#### 1. Title of the Practice

##### **TRANSPARENT ADMISSION POLICY**

#### 2. Goal

Every year the college receives a lot of applications from candidates who seek admission to various programmes that the college runs. It is not always possible for the college to accept each and every candidate who seeks admission to the college, because in most of the cases the number of applicants is much higher than the number of seats available. So, there comes the need of selection of candidates for various programmes. That is why, the college has been following a clearly defined admission policy and maintaining transparency in this regard, so that there cannot be any dispute regarding admission and the best candidates can be accommodated.

#### 3. The Context

In adopting an admission policy, the college has to keep in mind these things: (a) In most cases, the number of candidates seeking admission to various programme is much higher than the number of seats available in that programme. (b) The college is situated at a locality, where diverse communities and groups of people reside, and the candidates who apply for seats in this college represent this diversity. (c) A large number of candidates come from economically backward class. (d) Most of the candidates belong to the locality where the college is situated, and therefore, there is a constant pressure of the local people on the college matters. (e) The main objective of the college is to encourage quality education, and the college does not want to make any compromise in this regard. Keeping all these things in view, the college has been following a transparent admission policy for so many years.

#### 4. The Practice

The admission policy of the college is clearly stated in the prospectus, Merit is the only basis of admission in this college. Of course, there are reservation of seats for Scheduled Castes, Scheduled Tribes (Hill), Scheduled Tribes (Plain) and Other Backward Castes as per the State Policy and constitutional provision. Certain seats are also reserved for Physically Handicapped

candidates as per the Govt. rules and regulations. Besides all these, the college, of its own, reserves a few seats for candidates showing excellence in sports and cultural activities (State/National level) and also for candidates having 'A' and 'B' certificates of N.C.C. Even in the reserved categories mentioned above, merit is the benchmark for selection of students. The college has the provision to give fee relaxation to meritorious students belonging to economically backward classes from the Students' Aid Fund. All these provisions are mentioned in the prospectus published annually in clear terms. The college authority constitutes an Admission Committee consisting of teachers, and this committee conducts the entire admission process. Before the admission, the Admission Committee declares the list of selected candidates in order of merit, category wise, citing the marks they secure in the qualifying examinations. The Committee also declares a waiting list in order of merit, in which the marks secured by the candidates in the qualifying examinations are mentioned properly. Thus, the whole process of admission is made public.

#### 5. Evidence of Success

The transparency maintained in the Admission Policy has brought about tremendous success in respect of achieving the desired goal. Firstly, the college has been getting good students because of the transparency in the admission process. Secondly, the college has been able to avoid all kinds of controversies and disputes as regards admission. Thirdly, the college has been able to avoid all kinds of pressure in the matters of admission. Most importantly, this transparency in matters of admission has been appreciated highly by the students, the parents, and the society as a whole.

#### 6. Problems Encountered and Resources Required

The major problems encountered in adopting a clearly defined, transparent admission policy in this college are these: (a) As the number of candidates seeking admission is too high, particularly in the B.A. level, the college has to face tremendous pressure to accommodate more students than it can. (b) In the Higher Secondary (Arts) level, a large number of students pass out every year from this college, and they expect admission to Degree level in this college again. They become a source of pressure for the college. To increase number of seats, particularly in the B.A. level, there is the need of more classrooms and more teachers.

#### 7. Notes (Optional)

Whatever the pressure may be on the college in connection with the admission process, the college has never compromised in respect of quality, and therefore, the college has never done away with its stated policy as regards admission. Of course, in the last four years, the number of seats in the B.A.

class has been increased from 320 to 350, and in the year 2013, even the evening shift was introduced in the B.A. level. But still the demand is mounting, and despite that, the college is determined to go with its transparent admission policy.

## Practice II

### 1. Title of the Practice

FIELD STUDY

### 2. Goal

The main aim of this practice is to introduce the students to the practical aspects of the subjects taught. This helps the students to acquaint themselves with the objective world around them instead of keeping themselves confined with the information stored in the books. At the same time, it helps them to connect their knowledge gathered through study of textbooks to the actual things. Though field study is not at all possible in all the subjects, it has a great importance in certain subjects like environmental studies, anthropology, botany, zoology, history, geography, Assamese, economics etc. The main goal of the field study is to give the students the opportunity of the firsthand knowledge.

### 3. The Context

The practice of field study has several important features to address to. Firstly, at our college, the number of students is quite high so far as arrangement of field study is concerned, and it is not at all possible to give the same students opportunity of field study in more than one subject. Subject-wise speaking, in some subjects the number of students is high again, and it becomes difficult to arrange field study accommodating all the students of that subject. Thirdly, fund is a major concern for the field study. Till now, the field studies are being arranged with the fees from the students. But the money collected from the students is not at all sufficient for organizing a proper kind of field study. Fourthly, the field studies are carried out in many subjects according to the curricula designed by the University, and there is not much scope for any innovation in this regard. But in some subjects, the concerned departments have initiated field study outside the University syllabus, and in this respect, the concerned departments have designed their own frameworks for such out-of-curricula field studies, and are implementing them according to their own conveniences

### 4. The practice

In many subjects, educational tours or field studies are parts of the syllabus. In these subjects, field studies are organized according to the courses designed by the University. As Environmental Studies is a compulsory subject in the science and the arts stream, the number of students who are to be taken for field study becomes quite large and it becomes difficult for all the students to get desired benefit from the field study in this subject. In some other subjects, the number of students is not beyond control, as they are not compulsory subjects. The students are taken to selected places, where they can get the opportunity to get firsthand information about the things they learn in their books.

The field studies in subjects like Assamese, Economics, History are quite an innovative idea, because in Assamese only in the fourth semester of the Major course there is the provision for field study, while field study is organized for the first semester students too. In the subjects History and Economics too, particularly major students are taken to field study and survey works not covered in the syllabus of these subjects.

In case of the University-determined, syllabus-directed field the students are taken to some nearby or distant places, as the case may be, according to its importance in respect of the course. It may be a day-long programme (particularly in case of Environmental Studies) or a longer programme, according to the necessity. In case of the field study of Assamese, the department takes students of major course to certain places, where the students can get acquainted

with the ancient scripts preserved. For example, the ancient scripts carved on stones found in North Guwahati and also in the State Museum in Guwahati give the students an opportunity to take interest in the study of ancient scripts. In case of history, the students are taken to some place of historical importance of that place. In Economics, students are taken to places, where they can study the economically relevant issues in the lives of the people there. After the field studies the students have to prepare individual reports on the study, and it helps the students to acquire knowledge about systematic studies.

#### 5. Evidence of Success

The field studies have helped the students to a great extent. It has encouraged them to go deeper into the subject. It has also opened up before them some areas of study, which don't have much scope for exploration in the syllabus of the concerned subjects. Field studies have brought knowledge of the students outside the pages of their books, and helped them to have a wider perspective of the subjects. For example, the students of Assamese in major course have to study about ancient scripts. It is because of their exposure to the real ancient scripts engraved on stone in the ancient time, they have got wider ideas about ancient scripts. The reports that the students have submitted after the field studies have shown that there has been a positive impact of the field studies on the students.

#### 6. Problems Encountered and Resources Required

The main problem in organizing field studies is the number of students. Though the syllabus of Gauhati University have made provisions for field study in some particular students only, there should have been provisions for field study for all the undergraduate students, if not as a part of the curricula, then as a part of the co-curricular activities. The college thinks that it would have helped the students in widening the horizon of their knowledge and perception. But with a number of students nearing 1300, it is difficult to organize field studies for all the students on the college's own accord. The second problem is finance. The college has to depend on the fees collected from the students to organize a field study. But the fund generated through the fees of the students is not sufficient to have a field study in proper sense.

#### 7. Notes (Optional)

The college believes in giving the students wider opportunities for learning, and learning cannot be confined only to the class rooms. That is the reason why there is so much emphasis on field study. It is also expected that the field studies will help establishing a close connection between the students and the society.
